

Introduction

Welcome to <http://4sale.890m.com>.

These websites are only build to sale a private property thru the internet. The aim would be a stress less and relaxed deal between the current and the future owner. Not spending grands to useless agents or consultants for research or estimations. We want to use your money for hardware, not for hot air.

Lets give a short description of our object.

In the east Germany, the industrial growing state of Saxony, between the big cities of Dresden and Chemnitz is the city of Oederan. This beautiful, amazing object is directly located by side the B173 main road.

On a big ground, which has plenty of expansion opportunities, is the business and living building. The building is currently used as a car repair work shop. But there is no need to continue this business. Good ideas are doing businesses inside like Butchery, Bakery, IT or Telecommunication, Medical Healthcare for Human or Animals, Fast Food Restaurant or any others.

A big park place and a long green garden behind the showroom gives the whole object a charm, like working in garden Eden. You have a beautiful view over the whole village and you are the first business, people can see on entering the village.

Please enjoy exploring a preview of a future settled real estate.
